Agrichem® Flowable Thiram is white aqueous suspension of thiram for a cost effective control of the 'damping off' fungi.

With over 20 years of use it has a proven track record both on its own or alongside various seed treatments for full disease control, including use as a soak to control *Phoma betae* and other seed-borne diseases.

Agrichem® Flowable Thiram is non-coloured and therefore, can be used with a variety of colourants and polymers.

Agrichem® Flowable Thiram is supplied in 20 litre drums for easy handling and avoiding committing to larger quantities and having to carry stock.

With over 20 different crop types approved, **Agrichem® Flowable Thiram** is the first choice for low cost seed treatment.

Agrichem Flowable Thiram contains Thiram.

Always read the label. Use pesticides safely.
